Next Generation Children's Centers is OPEN for families!

NGCC will make every effort to be open every day, with minimal scheduled closings per school year. Holiday closings are based on Federal and State holiday closing guidelines and required EEC training requirements (included in Staff Development Days). These scheduled closings are based on how holidays fall within the week, which may include a Monday closing in observance of a holiday that falls on a Sunday.

The management of NGCC reserves the right to decide to close any one or all of our school locations based on severe or unexpected weather conditions. If it is decided that there will be weather or an EEC-related full day closing, early closing or delayed closing, all Directors at each affected center will be notified directly by management and families will be notified by multiple means. EEC mandated closings include, but are not limited to, power outage, water failure, heating or air conditioning malfunctions. No tuition adjustments are made for weather-related closings.
